

Advisory & Professional Services

In Brief

Enterprises and service providers are facing the challenges of growth, business transformation and technological change in quite difficult economic conditions.

Cutting costs of your business, improving your operational efficiency and time to market for new business solutions are critical to the success of your company. Our highly skilled consultants could apply their innovative thinking to create a plan of action and discover the value of your most challenging business issues. Our advisory and professional services offer an opportunity that can help you optimize your IT infrastructure and operations to reduce costs and gain your competitive advantage.

We are experienced in deploying large and complex solutions at Baltic market, thus covering the full life cycle of technology, including strategic planning and integration. We could be useful in planning, deploying, optimization, managing and running Your network infrastructure as a single service or as part of a complicated network solution.

Advisory and Professional services provide customized solutions that can fill resource gaps and support you through all phases of the IT project lifecycle.

- **Managed services:** Network service management offering consists of architectural end-to-end network design plans, engineering, staging, implementation and ongoing operations of the customer network solution. Project management techniques, governance model and business acumen are called to ensure that Your intentions are implemented and managed to meet the requirements, and overall business objectives.
- **Project Management:** Our extensive experience in managing large, complex networking projects through comprehensive project plans and schedules with timely resolutions of project issues and risks.
- **Lifecycle Engineering** provides technical engineering support for customer network changes or expansions, including capacity planning and hardware and software upgrades.
- **Procurement process management** including requirement definition and bid management.
